

Landing on Mars draws cheers, hugs and tears

ROCKSPRINGS, Colorado—After more than three decades of trying to get there, the Mars rover Spirit landed on the red planet on Tuesday at 4:35 a.m. local time. The landing was a triumph for NASA and the world, as the rover became the first to land on Mars. The rover is named after the 1930s jazz singer, and it is expected to stay on Mars for at least three months.

THE 2002 ELECTIONS ARE BEING CONSIDERED BY MANY AS A "TWO-TURNOUT" election. The first turnout is the one that takes place in the months leading up to the election, when voters are asked to vote on a number of issues. The second turnout is the one that takes place on election day, when voters are asked to vote for a candidate. The first turnout is the one that is most important to the candidates, because it is the one that determines whether they will be on the ballot for the second round of voting. The second turnout is the one that is most important to the voters, because it is the one that determines whether they will be able to vote for their preferred candidate.

Figure 1 is a schematic representation of the experimental design. It is divided into two main sections: 'Pretest' and 'Main Experiment'. The 'Pretest' section shows a flow from 'Pretest' to 'Main Experiment'. The 'Main Experiment' section shows a flow from 'Main Experiment' to 'Posttest'. The 'Main Experiment' section is further divided into 'Pretest' and 'Main Experiment' sub-sections. The 'Pretest' sub-section shows a flow from 'Pretest' to 'Main Experiment'. The 'Main Experiment' sub-section shows a flow from 'Main Experiment' to 'Posttest'. The 'Main Experiment' sub-section is further divided into 'Pretest' and 'Main Experiment' sub-sections. The 'Pretest' sub-section shows a flow from 'Pretest' to 'Main Experiment'. The 'Main Experiment' sub-section shows a flow from 'Main Experiment' to 'Posttest'.

[illegible]

Figure 1 consists of four scatter plots arranged in a 2x2 grid. Each plot shows the relationship between the number of children (X-axis) and the number of children who are not in school (Y-axis). The plots are labeled 'a', 'b', 'c', and 'd' in the top right corner. Plot 'a' shows a positive correlation. Plot 'b' shows a positive correlation. Plot 'c' shows a positive correlation. Plot 'd' shows a positive correlation.

Look up "complexity" when needed in your glossary, or ask the author or editor for a definition. Remember, complexity is not the same as being hard to understand. It's the quality of being hard to understand that counts.

The researchers say the use of an active program, such as the one used in the study, may be more effective than a passive program, such as the one used in the study.
